

# Former Kmart Fire Asbestos Sample Locations and Results - July 21-25, 2023

- Through 7/25/23 EPA has collected 32 samples from ambient air and 17 from fire debris, and has received confirmation of 27 of these sample results.
  - All 11 of the confirmed debris samples contain no asbestos.
  - 14 of the air samples have been confirmed to contain no asbestos, while two of the air samples detected fibers and have been sent for additional analysis to determine if the fibers are asbestos.
